## Effectively Enforcing the Energy Codes

Building energy codes are complex. Plans examiners and building inspectors are expected to understand and enforce multiple codes. Conflicting priorities, time, workforce and budget constraints impact ability to deliver energy savings. This hands-on, activity rich course strives to provide plans examiners and building inspectors with the knowledge and skills needed to more quickly and effectively enforce the energy code for Nonresidential projects. This course is designed to help plans examiners and building inspectors:

- Understand the 2008 building energy efficiency standards for nonresidential new construction, additions, and alterations
- Understand the purpose of each of the nonresidential compliance forms and related documents
- Effectively communicate energy efficiency compliance options and requirements to builders and clients
- Apply your knowledge of Standards to typical job tasks
